How to tune into My18 Lansing/Jackson:

Over-The-Air: If you don't have cable, "over-the-air" is the only other means by which you can watch us.

If you opt for this method, we are on channel 18. If we don't come in that well, try hooking up an antenna. Now before you run out and buy an antenna...read on. WHTV is a UHF (Ultra-High-Frequency) station not a VHF (Very-High-Frequency) station.

What's the difference? Why does this matter? If you buy a set of "rabbit ears" to help pull our signal in, chances are they won't work too well. Instead, buy a UHF "loop" or UHF "bow-tie" antenna. Of course, putting up a rooftop antenna would be best, but that tends to involve a lot of work.
